Week 2
Security Policy Principles

Security Policy Principles

- Accountability
  - Individuals are responsible for their actions
  - Each person is uniquely identified
- Authorization
  - Rules are needed to define who can use what resources in what conditions
- Least privilege
  - Users should be authorized with the least privileges to perform their jobs

Security Policy Principles

- Separation of duties
  - Mutually exclusive privileges should not be authorized to the same person
- Auditing
  - Work and its results should be monitored
- Redundancy
  - Critical resources or services should be ready for recovery
